

Scholars suggest Human DNA shows signs of being an Invasive Extraterrestrial Parasite

by Dr. John Chang

Many scientists have documented that over 95% of Human DNA does not have a known purpose. This DNA has been colloquially referred to as "Junk DNA".

Up to 97% of the human genetic information (DNA) is seemingly needless, repetitive "junk" - only about 3% is known to generate proteins, deserving the name "gene". The rest used to be called "junk DNA", lately renamed as "non-coding introns", sometimes labelled by the mysterious, though not very explicit description that these self-similar strands "regulate gene expression".

[LINK](#)

However, other researchers have not been content to simply classify this predominant part of DNA as "one of life's mysteries". Scholarly groups at the forefront of investigative researchers are gathering details which suggest that DNA may not substantively exist as a "building block of life". Rather, it appears that the substantive function of DNA is to act as a "parasitic inhibitor" and "regulator" of life on planet Earth.

Dr. John Lash documents, for example, in metahistory.org:

Recent work by Russian biologist Piotr Garjajev and some Russian linguistic experts suggests the same thing, and, more specifically, this research may show that junk DNA, rather than being a discard, is "a computer hologram that works with laser-type radiations." In short, DNA is an extraordinary generator of perceptions, an instrument of virtual reality.

By accepting the link between DNA and emotional and mental activities, we may begin to imagine DNA as a complex program that directs the life process (regulating our metabolism, for instance), but impedes our consciousness from complete manifestation. [LINK](#)

Research testimony that includes ancient representations, suggest that DNA was implanted in humanity by Manipulative Extraterrestrials. The fact that over 95% of DNA does not support vital biological living processes suggest that it is conceivable for biological life to exist without any DNA.

More than 95 % of all DNA, had been first called "Junk DNA" by molecular biologists, because they were unable to ascribe any function to it. They assumed that it was just "molecular garbage". But, if it were "junk", the sequence of the "syllables", i.e. the nucleotides in DNA should be completely random. However it

has been found that the sequence of the syllables is not random at all and has a striking resemblance with the structure of language (ref. Flam, F. "Hints of a language in junk DNA", Science 266:1320, 1994), that is alien to humanity. Scientists now generally believe that this DNA must contain some kind of coded information.

You might wonder, what understanding of our human origins could account for the parasitic implanting of DNA into biological life on planet Earth? Indeed, this further inspires the question; *who are we?* What are our origins; why do we exist' and from that context, *where are we going?* For starters, it is vital that we as humanity begin to question the "understandings" of reality, that have been presented to us, by elites who have been documented time again, for spinning a "web of deceit". In this context, it is also correspondingly vital to critically consider prospective new insights, irrespective of how much the Establishment responds with denial.

Gnostic insights into an apparent regressive alien artificial intelligence that contrived this universe.

The existence of historical and on-going Extraterrestrial contact with Earthbound humanity, has been at the forefront of this denial. Indeed, the alleged contactees of both Manipulative and Ethical Extraterrestrials offer insights into a context of genetic manipulation within biotic life on Earth.

The article titled "Scholars suggest Extraterrestrial-like DNA fractals floating in the Human Gene Pool" explored fractals as evidence that Manipulative Extraterrestrials may have sought to genetically manipulate and control humanity. [LINK](#). A group of researchers associated with Fractogene.com document these apparent similar artificial "fractal signatures" across different biotic life forms on Earth:

This uncertainty if "junk DNA" is really "junk", that caught some scientists by surprise, is now history. Indeed, scientists were never quite sure that any part of DNA could be discarded outright, and even the question was raised if introns might play a role in evolution, see Mattick, 1994., Klyce, 2002). The bombshell of the 5th of December issue of the highly reputed Nature 420, 509 (2002) revealed that the 99% of the genes of the mouse have direct equivalents with the humane genes. What does this mean? [LINK](#)

FractoGene's pending patent, conceives life on Earth as being linked to a fractal elaboration of a gene by its introns (the fractal model of Purkinje cell was published by Pellionisz, 1989). In so doing, Fractogene seems to have stumbled upon "introns" as Manipulative Extraterrestrial signature of the demonic inorganic mechanical intelligence that ancient pagan Gnostic referred to as "artificial man" or the "archons". Introns, derived from the term "intragenic regions" and also

called *intervening sequence* (IVS), are DNA regions in a gene that are not translated into proteins.

Many studies have documented evidence that introns are either directly or indirectly involved in cancer causation, and other diseases. Mutations in the introns have been specifically linked to cancerous "tumorigenesis progression."
[LINK](#)

Among the many other intron genetic variations that have been linked to cancer (in this case lung cancer) is a *K-ras* intron variation involving tandem repeats in the *H-ras* 3'-untranslated region. Mutations in introns may influence neoplasm development because mutations that occur in introns (or in the DNA sequences that flank the gene) can affect the various steps required for normal expression of the gene even though the intron codes may not be detectable by studies of the protein product of the gene. If the defective expression of a gene product is a tumour suppressor gene or a proto-oncogene, cancer may result. [LINK](#)

Zecharia Sitchin documents the DNA double helix as being created by Gnostic identified aliens, that Dr. Sitchin further links to extraterrestrials which inhabit and preside over "Planet X". Dr. Sitchin documents findings of the double helix "entwined serpents" perhaps as some sort of alien "sacred geometry". Dr Sitchin links these artefacts as attesting to alien genetic experiments on humans that were needed by 'archons', as slave labour. [LINK](#)

Insights from the ancient pagan Gnostics, indigenous elders, and contactees of alleged Ethical Extraterrestrials like **Alex Collier**, suggest that the origins of humanity may be as an immortal and highly sexual being of great conscience and empathy. Gnostics that sought to rebel against Manipulative Extraterrestrials that sought to repress human sexual energies, "engaged in ritual orgies that involved the ingestion of sexual fluids as sacramental substances." [LINK](#)

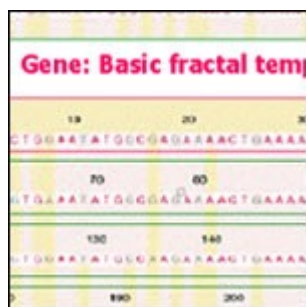

John Lash further documents:

Sexual orgies among the Gnostics would not have been merely for the pleasure and indulgence: although they would not have excluded that, either! *They worshipped the supernatural force that resided in their own bodies.* In fact, the word "orgy," Greek *orgia*, means simply, "working, activation."

The alien powers do not see those who are clothed in the perfect light, and so they are not able to restrain them. By the rite of sacramental union, one is ensheathed in this light." (*Gospel of Philip*, passage 70).

Nymphion was a code term for the cell-of-light or protective aura generated by ritual intercourse. Within the cell, the initiates overcome the influence of the Archons who produce error in our minds, and threaten to take over our bodies [LINK](#)

Was DNA engineered by regressive aliens to repress the full expression of human nature that includes sexuality?

Enlarge 
DNA fractal patterns consistent with regressive alien artificial intelligence alluded to by Dr. John Lash.

Apparently, humanity may have existed before being "infected" by regressive aliens, with 'DNA'. It is apparent that DNA may have very well been bio-engineered by regressive aliens as substantive parasite to the existence of humanity as biotic and spiritual trans-temporal beings. That is the idea of humans had existed as socially liberated beings of conscience, with multidimensional perceptual capabilities, not being bound by prevailing Earthbound human conception of linear time.

Alex Collier testifies that regressive aliens were brought into the human space-time continuum by Nazi scientists, (in an antecedent and parallel space-time continuum), who were driven by a self-serving ego driven agenda. [LINK](#) The result of this temporal breach was the entry of lower dimensional regressive aliens, seeking to conquer a higher dimensional plane of consciousness, that could then travel back in time to the very inception of human and other life. In the process, these "regressive aliens could then implant a regressive alien DNA matrix, that would result in the creation of a parallel space-time, controlled by the archons. Gnostics documented these aliens as seeking to "play God". Furthermore, by isolating Earth in an artificially generated universe, Collier and Dr. **John Lash's** research suggest that archons apparently hoped to inspire humans to create organized religions that sought to worship the "miracle of life" on Earth, and the faith-based 'faces' of the archons as "creators of the universe".

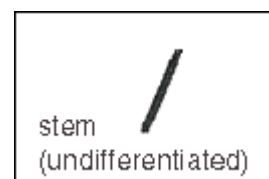

Gnostic insights documented by Dr. John Lash suggests that the biotic consciousness of Earth was brought from an apparent "organic universe" into a parallel imitation universe. Gnostics suggest that as a result of the same temporal interference alluded to by Alex Collier, Earth as an organic biotic consciousness was trapped into an inorganic "imitation" universe, that exists as an artificial copy of the "organic universe" in which human origins lie:

Gnostic teachings constantly emphasize that the Archons are imitators who cannot produce anything original, yet they arrogantly claim they can. The Lord Archon is called *antimimon pneuma*, "counterfeit spirit." (*Apoc John III*,

36:17. The term occurs several times in different texts.) The cosmos he produces is described by the Coptic term *hal*, "simulation." The vast planetary system of the Archons is a stereoma, a virtual reality projection in simulation of a higher dimensional pattern.

Typically, the Archontic framework of the planetary system has been depicted by "armillary bands" that surround the Earth. (Illustration from A. Cellarius, *Harmonia Macrocosma*, 1660.) Taken in many esoteric systems (Hermetics and Rosicrucianism) as the preeminent image of cosmic harmony, the model of the planetary spheres reflects a mindless imitation of divine design, not the living reality of the cosmos.

Yaldabaoth, the presumed all-mighty creator God, really creates nothing; instead, he copies from "archetypal" patterns in the Pleroma. The planetary stereoma of his making is like a plastic copy of an abalone shell. Only someone who does not know the reality of the abalone shell, and what living miracle of nature is required to produce it, would accept the plastic substitution.

Here again, the *cosmic- noetic parallel* applies: Archons simulate in the cosmos at large, and they also simulate in the human mind. This is a key indication of their effect, a clue to their subtle intrusion tactics. [LINK](#)

The Gnostics describe the 'universe' beyond Earth as a "plastic copy" contrived by regressive aliens that attempt to mimic organic reality. Gnostics suggest that humans as a result of a time breach were trapped in an artificial universe that operates as sophisticated computer generated virtual reality ruse. According to investigative insights concerning DNA as a parasite, "junk DNA" is alien software written in an alien language. It is further argued by **David Icke** and others, that DNA fractals, reinforced by other alien "sacred geometry", represses the full awakening of the human consciousness. This described substantive DNA parasite prevents humans from readily seeing not only the artificiality of the universe beyond Earth, but also, according to Icke, alien shapeshifters; and humans from discerning regressive alien intrusions on the human mind, including value systems.

Alex Collier suggests that through DNA, regressive aliens:

[W]anted to hold us back was because they found out who we were on a soul level. Again, according to the Andromedans, we humans are part of a group of energies that they know of as the "Paa Tal". The reason that the Andromedans use the word Paa Tal, which is by the way a *Draconian word*, is because the Draconians have legends about warring with a race that was creating human life forms that were opposed to Draconian philosophy. The Paa Tal created life forms that could evolve on their own, with free

expression. The Draconians, on the other hand, created races to function as a natural resource for their pleasure. So, you have two very different philosophies. [LINK](#)

Furthermore, Alex Collier alleges as a contactee:

Nigel Kerner, an investigative journalist, who is the son of a Naval Officer who served in South East Asia Command of the British Fleet, has extensively studied aliens that the Gnostics referred to as "artificial man" or "archons". He wrote a book about these regressive aliens. He affirms:

They [Draconians] have conquered many star systems and have genetically altered many of the life forms they have encountered. The area of the galaxy most densely populated with Draconian sub-races is in the Orion system, which is a huge system, and systems in Rigel and Capella.

The mind set or consciousness of the majority of races in these systems is Service- to-Self, and as such they are always invading, subverting and manipulating less advanced races, and using their technology for control and domination. This is a very old and ancient war, and the peace that does not exist is always being tested by these beings, who believe that fear rules, and love is weak.

They believe that those they perceive to be less fortunate, in comparison to them, are meant to be slaves. This belief system is promoted at birth in the reptilian races, wherein the mother, after giving birth, will abandon the offspring to fend for themselves. If they survive they are cared for by a warrior class that uses these children for games of combat and amusement. [LINK](#)

Alex Collier further stipulates:

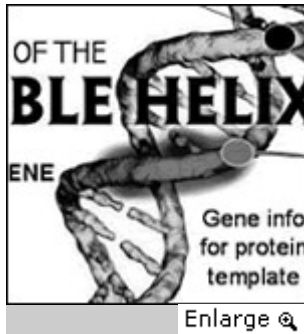

"...The expression 'Draconian thought' is an expression on our world. I would suggest you research that." [LINK](#)

[T]here is no greater peril to their future welfare and indeed the welfare of all children in all human generations to come, than the danger these entities present to all sentient living beings in any planet that supports intelligent life. [LINK](#)

In book entitled *Human Devolution*, **Michael A. Cremo** documents humans as having existed on Earth for hundreds of millions of years. This evidence totally contradicts Darwinian evolution as well as religious 'Creationism'. Cremo then asks the question: "If we did not devolve up from apes then where did we come

from". In answer to that question he comes to the conclusion that: "We did not evolve up from matter; instead we devolved, or came down, from the realm of pure consciousness, spirit". Six years previous to Cremo's book, when *The Song Of The Greys* was published, Nigel Kerner had come to the same conclusion.

[LINK](#)

Cremo proposes that before we ask the question, "Where did human beings come from? we should first contemplate, "What is a human being?" Cremo asserts that humans are a combination of matter, mind, and consciousness (or spirit). [LINK](#)

In the book *Life Itself: Its Origins and Nature* (1981), Dr. **Francis Crick** -- a Nobel prize-winner and the co-founder of the shape of the DNA molecule -- claimed an advanced civilisation must have "transported" DNA as the "seeds of life" to Earth in a spacecraft. Nobel laureate Dr. Francis Crick who posited an extraterrestrial link to life on Earth, is not alone in this viewpoint within the scientific community. The same year that *Life Itself* was published (1981), Sir **Fred Hoyle** authored *Life from Space*, in which he took essentially the same position. In fact, in an article that year in *Nature*, he wrote:

"The likelihood of the formation of life from inanimate matter is one to a number with 40,000 noughts after it.... It is big enough to bury Darwin and the whole theory of evolution. There was no primeval soup, neither on this planet nor on any other, and if the beginnings of life were not random, they must therefore have been the product of purposeful intelligence." (Hoyle: 1981, 294:148).

Dr. Francis Crick was one of the two scientists who discovered the structure of DNA during the 1950's. Crick won the Nobel Prize for his work. Dr. Crick applied the same rigorous disciplinary standards to his Extraterrestrial link findings with DNA.

Scientists affirm that DNA is aperiodic crystal, that its structure (the way it is built) can be compared to crystal elements. For example, minerals like quartz and silicon are crystals. They are extraordinary conductors of information and energy.

It is then interesting to note that certain implants and psychotronic weapons that can influence the behaviour of human beings function on these crystal properties. [LINK](#)

Alex Collier suggests that regressive aliens constructed Human DNA from "22 races that included 17 human, the rest insectual, botanical and reptilian." [LINK](#).

Dr. Lash furthermore postulates:

Could we then postulate that DNA, loaded with living memory of our "ancestors" and all species that have contributed to the development of *homo sapiens sapiens*, contain a series of instructions that generate our consciousness and our perception, somewhat in the way of an extremely sophisticated implant?

Today, the attribution of consciousness uniquely to the neurochemical activity of the brain constitutes a scientific dead end. Researchers have come to conceive the brain as a sort of combination of software and hardware with holographic properties.

Consciousness is not exclusive to the brain, which is rather a sort of broadcasting station, or an antenna for a station. In certain conspiracy literature, especially David Icke, this DNA is like the software that keeps us locked into a certain level of perception. Could DNA be the bars of our mental prison? [LINK](#)

Jeremy Narby, author of *The Cosmic Serpent*, points out that DNA has a serpentine form.

In shamanic vision under the effects of ayahuasca, DNA... is perceived as spirit or, more clearly, a multitude of spirits called Maninkaris. These spirits would have come to earth in the form of a shower of dark entities, a sort of cross between reptiles and whales, as described in a vision under ayahuasca by anthropologist Michael Harner:

First they showed me the planet earth as it was eons ago, before there was any life on it. I saw an ocean, barren land, and a bright blue sky. Then black specks dropped from the sky by the hundreds and landed in front of me on the barren landscape. I could see the 'specks' were actually large, shiny, black creatures with stubbly pterodactl-like wings and huge whale-like bodies... They explained to me in a kind of thought language that they were fleeing from something out in space. They had come to the planet Earth to escape their enemy.

The creatures then showed me how they had created life on the planet in order to hide within the multitudinous forms and thus disguise their presence. Before me the magnificence of plant and animal creation and speciation – hundreds of millions of years of activity – took place on a scale and with a vividness impossible to describe. I learned that the dragon-like

creatures were thus inside all forms of life, including man. (Cited by Narby, *The Cosmic Serpent*, p. 55)

Harner had this vision in 1961. Only in retrospect did he link these black dragons to DNA:

Certainly, Harner's vision, typical of the kind experienced by Ashaninka Indians under the influence of an hallucinogenic potion, can be read at a metaphoric level, but it is also clear that the idea of the Maninkaris is fundamental to the Indians in the understanding of life. One of the jungle sorcerers Jeremy Narby met defined these entities: "They are invisible entities found in animals, plants, mountains, rivers, lakes and certain crystal rocks."

Maninkari means "those who are hidden," but who can be seen by ingesting tobacco and ayahuasca.

[T]he Maninkaris live in hiding, and they are dark beings who influence the behaviour of humans.

As for the flyers [alien DNA implants/inteceptors] according to Carlos Castaneda, they feed on the "luminous layers" of human consciousness, especially those of young people. The flyers leave nothing but a thin band of consciousness, just enough for the person to survive, until they come and get the rest, later on. Their activity is anything but positive. [LINK](#)

Could DNA fractals be what Metahistory.org writers suggest could be a regressive psychotronic weapon that works by effecting behaviour or inducing a state of virtual reality, analogous to the implants for jet pilots which can manage radar signals in the combat zone?

Nigel Kerner treats DNA as a matrix for the entire human body (brain and skeleton) to become a sort of "antenna" structure for alien eugenic repression and control. Dr. Lash further elaborates:

It is through this antenna that our consciousness manifests, but in a deformed and diminished manner. [T]his antenna suffers interference by parasitical entities, and so our consciousness is altered and manipulated in ways that make us suffer. [LINK](#)

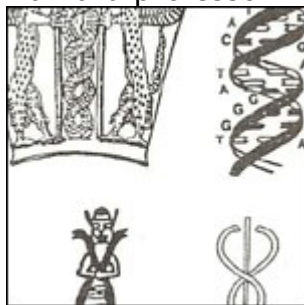

Dr Lash suggests that the more our emotions operate in a chaotic and painful manner through prisms of fear, anger and violence, the more they influence our DNA, and the more our DNA reduces and conditions our perception in a really negative way.

Our level of awareness depends on DNA which interprets reality for us (with and through the brain), rather than showing us things as they really are. In his most recent book, Icke says that what we believe to be real is an illusion. He refers to "a voice in the head" that recalls what Castaneda says of the flyers: they think in our place, they make us react and condition our capacity to feel "reality." [LINK](#)

Dr. Lash therefore suggests that a virtual reality purpose of DNA allows regressive aliens to operate beyond the perceptual capabilities of humans.

The phenomenon of shapeshifting has been carefully studied by Marie-Therese de Brosses, a French journalist who specializes in alien abductions, a writer, and tenacious investigator of anomalies. She reports an Australian case in which the abductee is told by a Grey: "We appear in the form you expect to see." She has also reported the case of women who find their husbands, boyfriends, or even movie stars, in a flying saucer. After the sexual act and the extraction of tissue or ova, they realize that the husband, boyfriend, or actor is in reality an extraterrestrial. Marie Therese de Brosses reckons that this kind of ET phenomenon is very close to the manifestation of diabolic and [fallen] angelic entities in folk lore of the past. For her, "the parallel we can trace between ET apparitions, the Archons of the Gnostics and the flyers of Castaneda, is totally valid." [LINK](#)

Peter Gariaev and his research colleagues indicate "junk" DNA is in fact a sophisticated fractal-based language that is similar to the language of holographic imaged that is based on principles of laser radiations of the genetic structures, and which operates together as a quasi-intelligent system. Peter Gariaev is renowned for his discovery of the "DNA Phantom Effect" and as one of the founders of Wave-based Genetics. Gariaev's findings are consistent with the idea that DNA was constructed for alien biogenetic purposes. **Nigel Kerner** refers to this alien process of "genetic interception", and suggests that Gnostic identified "emotionless" cyborg-like aliens continue to abduct humans to pursue further genetic manipulations. There are numerous documented "experiencers" of such abductions detailed in part, on websites like ufoinfo.com. The late Harvard professor Dr. **John E. Mack** and other scholars have also detailed the

Enlarge

Zecharia Sitchin and other researchers link the DNA double helix to regressive alien genetic manipulation and the apparent "sacred geometry" of that artificial intelligence that has been uncovered by archaeologists through artefacts.

accounts of "experiencers" of such abductions that detail traumatic experiences to forcibly extract DNA, including male sperm and female eggs for apparent genetic "cross-breeding" experiments. [LINK](#).

Could it be that the function of DNA by regressive alien architects is to act like some kind of Trojan horse in a computer, that enables humans to be remotely controlled from expressing the biotic and spiritual potentials in human

development? It may be critical for humans to further seek to critically appreciate the role of DNA as a potentially "regressive building block" of life on our planet Earth.

Humanity seems to desire conditions for social justice, environmental stewardship, peace, toward mutualistic Human Development. However, it also appears that humanity's pursuit of these Human Development targets are being undermined by an on-going struggle against its own spiritual and biological consciousness. Why? Could the double helix DNA matrix, as suggested by diverse scholars, have been substantively designed to undermine human sovereignty, while appearing to be "beneficial", and axiomatic to life? This is a question which might be worthwhile to consider.
